Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3634

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6,8-12,14-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lodrick 5,072,908 in view of Haskell 411,521.

Lodrick Figs. 5 teaches the device claimed including 1st and 2nd jaw members 52 and 54 pivotally connected to each other via spring member elements 64. Also present are handle portions 60 and rack portion 58 comprised of a single opening to hold a pool cue. Absent is the plurality of rings for holding pool sticks.

Haskell teaches a first portion B having a plurality of rings A for the purpose of holding several umbrellas. The Haskell device is capable of holding pool sticks. To therefore modify Lodrick to include a plurality of rings (instead of the single opening 58) for the purpose of holding a plurality of pool cues would have, in view of Haskell, been obvious for one having ordinary skill in the art. Note that Lodrick teaches rubber or plastic material. Note also that the Haskell holder teaches pintle a2 and hinge piece B as a fastening between first portion B and the rack of rings A.

Claims 7,13,18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Applicant argues the device over figure 1 of Lodrick. However, the examiner has not relied on the embodiment of Figure 1 but upon the embodiment shown in Figure 5.

Rack element 58 shown in Figure 5 was referred to in the first office action.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
